And when you have iCloud Photos turned on, the people you favorite or name stay up to date across your Apple devices.. Teams mac app download. The Photos app scans your photos to help you quickly recognize the people, scenes, and objects within the photos.. Especially when there's software out there designed specifically to deal with an overload of pictures.

Depending on the number of photos that you have, you can watch a Memory movie of them.. Managing a huge gallery and organizing photos is a tricky business, even if you're generally tidy, so it's always a good idea to use some help.
